

To check if this page is printed at the correct scale  
this box should measure exactly 150mm x 50mm.

If it doesn't then check your print settings and make  
sure you select "print actual size" or 100%

Cut 1mm inside the top guideline.  
On the bottom edge cut along the points of the arrows.  
You do not want a black border on the finished template.

Place it on the guide block as shown in the book.

Choose whichever suits the wheels you build.

Instructions for making the truing stand are  
included in the wheelbuilding book available from:
