

Contents

- Introduction.....1**
 - The spoke length project..... 3

- Quick start guide 5**
 - Your first wheels..... 5
 - 1. Select your wheel components..... 5
 - A previously used hub..... 5
 - A previously used rim 5
 - Previously used spokes 6
 - 2. Work out your spoke lengths..... 6
 - 3. Obtain some wheelbuilding tools..... 7
 - 4. Lace your wheel..... 7
 - 5. Complete your wheel..... 7
 - 7. Your next wheel 8

- Components and features 9**
 - Hubs 10
 - Hub countersunk holes..... 10
 - Hub flange thickness..... 10
 - Spoke hole diameter..... 10
 - Non standard spoke holes 11
 - Straight pull hubs..... 11
 - Previously used hubs12
 - Rims 12
 - Rim ERD.....13
 - Rim spoke hole stagger.....14
 - Directionally drilled spoke holes.....15
 - How to check the rim stagger.....16
 - Eyelet design.....16
 - Nipple washers.....17
 - Pinned rim joints.....17
 - Welded rim joints.....17
 - Rim compressive force..... 18
 - Rim centering and wheel dish 18
 - Tension differences in a dished wheel 20

Offset rims	21
Offset frames	22
Conventional offset frame	22
Fatbike offset frames.....	22
Building a wheel for an offset frame	23
Spoke length calculations for Asym rims and offset frames.....	23
Spokes	23
Plain gauge spokes	24
Double butted spokes.....	25
Triple butted spokes.....	25
Oversized spokes	25
Bladed spokes.....	25
Straight pull spokes.....	26
Spoke threads	27
1.8mm spoke threads.....	27
Spoke stretch	28
Spoke nipples	28
Nipple head design.....	29
Internal nipples.....	29
Nipple corrosion.....	30
Self locking nipples	30
Interlacing cross laced wheels	31
Inside and outside spokes.....	31
Pulling and pushing spokes	32
Where to place the pulling spokes	33
Where to place the pulling spokes – summary	38
Disc brake road wheels	38

Wheel design **39**

Strong and durable.....	39
Want to go faster?	39
Comfortable wheels.....	40
How many spokes	40
Using different gauge spokes either side	42
Modifying the spoke tension	42
How many crosses in a cross laced wheel?.....	42
How to check the cross pattern	44
Radial lacing	44
Triplet lacing (2:1 lacing).....	44
Alternative lacing patterns	46

Missing out rim holes.....	46
Missing out hub holes	46
Design considerations - the Last Word.....	47
Tools.....	49
Spoke wrench	49
Wheel truing stand.....	50
Wheel dishing gauge	51
The nipple driver	53
Nipple holder	55
Leather gloves.....	55
Bladed spoke holder.....	56
Tensiometers	56
Measuring spoke tension using musical pitch	57
Musical pitch for tension balancing.....	57
Spoke lengths	59
Measure the rim effective diameter (the ERD).....	59
Additional rim dimensions.....	61
Rims with concealed spoke beds.....	61
Measuring hubs.....	61
Hub diameter	61
Hub flange offsets	61
The spoke length calculator.....	62
Enter your dimensions and wheel configuration.....	63
The spoke length table.....	63
Rounding the spoke lengths	63
Print the spoke table (your worksheet).....	64
Save the calculation.....	64
Straight pull spoke lengths	64
Flange diameter.....	64
Flange distance.....	65
Spoke offset	65
Shimano straight pull hubs	66
Building the same hub on a different rim.....	66
Lacing the wheel.....	67
Print your worksheet.....	67
Hub and rim checks	67
Label your spokes.....	67

Oil your spokes and rim	68
Lace the wheel	68
How to lace 2 and 4 cross wheels	79
Lacing a radial wheel.....	79
Cross combinations on the same wheel.....	80
Rims with concealed spoke beds.....	81
Option A, B and C lacing.....	81
How to lace option B.....	81
How to lace option C.....	82
Triplet 2:1 lacing.....	82
Spoke prep and adhesive	82
Loctite 222.....	82

Completing the wheel..... 85

1. Take up the slack.....	85
2. Align the spokes	87
3. Take up all of the slack	88
4. Improve the lateral trueness	88
5. Improve the radial trueness	89
6. Equalise the spoke tensions	90
7. Check the wheel dish	91
8. Final tensioning	92
i) Spoke twist	92
ii) Stressing the wheel (stress relieving the spokes).....	93
Complete the final tensioning	94
Tensiometers	95
Tubeless tyre tension drop	96
Wheelbuilding accuracy.....	96
How long should it take	97
Testing your wheel	97
Retensioning your wheel	98

Repairing wheels..... 99

Checking a wheel.....	99
Flat spots	99
Damaged spokes.....	99
Rim wear and damage	100
Nipples that will not turn freely	101
Truing a wheel	102
Spoke breakages	104

Replacing a broken spoke.....	105
Replacing all the spokes.....	105
Reusing spokes	106
Replacing the rim	106
Identical rim.....	107
Different rim.....	107
Replacing the hub.....	108
Truing a wheel built by someone else	109
Problem wheels	109
Wheelbuilding Checklist	111
Making your own truing stand	113
A discussion on ERD	121
Nipple Seat Diameter.....	122
Measuring the nipple seat diameter	123
ERD for rims with a concealed spoke bed.....	124
How nipple design affects spoke length	125
Wheel geometry	127
Standard cross laced wheel.....	128
Straight pull hub.....	129
Triplet lacing (2:1).....	130
G3 Lacing	131
Radial laced wheels	132
Drawing your own wheels in CAD	133
Geometric patterns.....	134
The spoke length calculator	135
